

DaCol

Secure...reliable...accurate...data collection

Improving your existing system, this accountable, easy to use, highly reportable data collection system fulfils your health & safety requirements, including Quest accreditations and other schemes.

DaCol enforces the collection of data on-time, at the correct location. It allows you to view snapshot intelligence of your site operations, identifying crucial problems that require immediate response as well as frequent, more in-depth audit appraisals.

It saves your operative time and increases the accuracy and consistency of your health and safety data. It provides reliable, long term electronic data storage, comprehensive historical analysis and in-depth reporting tools.

Readings you can record:

- PH & Chlorine levels
- Security, access & alarms
- Temperatures
- Cleaning & hygiene
- Fire & risk management
- Facilities management
- Wetside & dryside maintenance
- General operations

...in fact, complete flexibility to suit any requirements.

The DaCol solution is the unique, new, benefit-packed data collection system designed for the leisure industry.

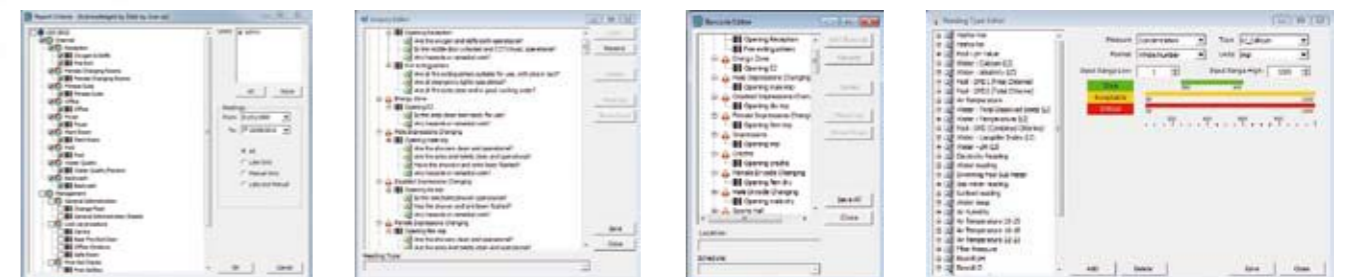

Why choose DaCol?

- Premises intelligence
- Exceptional reporting
- Operational insight
- Cost savings
- User accountability
- Ease of use
- Information sharing
- Increased data accuracy
- Reduced labour time
- Secure
